SWEATFLIX ATHLETICS

Official AI Asset Generation & Specification Guide

MASTER SPECIFICATION

Instructions for Asset Generation: Use this document to generate standalone, watermark-free images and loop videos for SweatFlix. All filenames match our React Native database schema for instant plug-and-play integration.

1. 3D Body & Anatomy Visual Standards

All exercise movements and anatomical models follow a **metallic chrome athletic CGI figure** style with glowing active muscle indicators and isolated pure white backgrounds.

Fig 1.1: Chrome Athletic Model (Barbell Military Press)

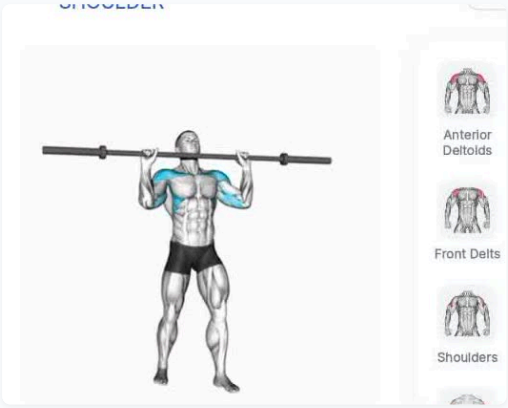

Fig 1.2: Movement View + Active Muscle Highlight Rail

Attribute	Specification Standard	Avoid
Body Material	Chrome silver / metallic titanium muscular anatomy with deep striations	Fleshy skin tones, cartoonish plastic, skinless anatomy
Apparel	Solid black or dark charcoal athletic compression trunks / shorts	Baggy shirts, bright shoes, visible third-party logos
Active Muscle Glow	Glowing neon overlay on firing muscle group (Crimson Red or Cyan Blue)	Whole-body aura, messy gradients
Background	Pure solid white (#FFFFFF) or transparent PNG alpha channel	Gym walls, floor shadows, reflections
Format & Ratio	1080x1080 (1:1 Square) or 1080x1440 (3:4 Portrait), high resolution JPG/PNG	Watermarks, text, phone borders

2. Ready-to-Copy AI Generation Prompts

A. Exercise Movement Prompt (Midjourney / DALL-E / Leonardo)

```
3D medical athletic CGI render of a muscular male bodybuilder performing [EXERCISE NAME, e.g. Barbell Standing Military Press], perfect biomechanical posture, chrome silver and metallic grey muscular anatomy, deep muscle definition and striations, black compression athletic shorts, active [TARGET MUSCLE, e.g. Anterior Deltoid and Triceps] highlighted in glowing crimson red, isolated on pure solid white background, high-end sports medicine visualization, 8k resolution, crisp studio lighting --no background, floor, shadows, gym, watermarks, text
```

B. Standing Neutral Anatomy (Anterior Front & Posterior Back)

```
Full body 3D anatomical CGI illustration of an athletic muscular man standing in neutral anatomical posture, [front view / back view], chrome silver metallic muscle tone, defined abdominal six-pack, vascularity, wearing black compression trunks, [chest / back] highlighted with soft glowing red overlay, isolated on pure white background, medical precision, clean render, 8k --no shadows, floor, clothes, text
```

3. Master Anatomy Models Manifest (8 Files)

Place these files into: `assets/images/anatomy/`

Target File Name	Anatomy View	Active Muscle Highlight Zone
`body_anterior_full.jpg`	Full Front Body View	Full anterior balance (Pectorals, Abdominals, Quadriceps)

7. Project Directory Structure

Place your generated files directly into these exact folders in your project directory:

```
fitness app/ └── assets/ ├── images/ │ ├── anatomy/ ← 8 3D Anatomy files (body_anterior_full.jpg, focus_chest.jpg, etc.) │ ├── meals/ ← 30 Gourmet meal images (breakfast_ham_eggs.jpg, etc.) │ └── challenges/ ← 4 Cinematic covers (challenge_fatburn_cover.jpg, etc.) └── videos/ └── exercises/ ← 36 Exercise loop videos (chest_standard_pushups.mp4, etc.)
```

> **Delivery Tip:** You can send or paste files in batches (for instance, the 30 Diet images first, or the 3D Anatomy images first). Once placed in the folders above, the app picks them up automatically.
